

OneStopCMS Key Functional Areas

An at-a-glance view of the main areas of functionality provided by a OneStopCMS website.

[Design and Structure](#)

How OneStopCMS supports the implementation of websites with different 'look and feel' and a description of the tools available to manage website structure.

[User Permissions and Visitor Interactivity](#)

Setting access permissions for different user and visitor groups and tools for building visitor interactivity into the website.

[Access to Information](#)

Tools to make information 'easy-to-find' on your website.

[Selling and Marketing](#)

Tools to promote products, services and events and to report upon website traffic.

[Ease of Administration](#)

Tools to simplify website administration.

[Multi-Lingual Websites](#)

An extra-cost option to automate the process of multi-lingual website maintenance.

[Cubik's Learning Management System](#)

Cubik offers an integrated e-learning solution as an extra-cost option to complement core EBDS functionality or as part of a OneStopCMS website.
