

## Who we work with

We work with charities, voluntary and not-for-profit organisations, public sector bodies and commercial clients. Here is an example of some of the people we've worked with.

### Charities

We have helped hundreds of charities develop their web presence. Here is a small sample of the charities we have worked with.

### Hospices

Cubik's website solution is perfect for hospices - easily advertise your fundraising events, take online donations and let your supporters purchase their Christmas cards, or send e-Cards to their friends.

### Housing associations

Many housing associations use Cubik for their web presence as our unique understanding of usability and accessibility goes hand in hand with our ability to develop bespoke integration solutions for existing back office systems.

### Private sector

Although the majority of our clients are charities and not-for-profit organisations, the Cubik website solution is perfect for organisations in the private sector - quickly maintain your website's content and generate income via the integrated e-Commerce module.

### Public sector

We've worked with many public sector clients to help them realise the potential of the web when using a Cubik website.
